L'âge de l'assuré correspond à la différence entre l'année en cours et l'année de naissance.

Selon l'Art. 1b OPP 2, les prestations versées ne devront pas dépasser de plus de 5% l'objectif réglementaire

Exemple de calcul : Le rachat maximal (art. 17) d'un assuré de 30 ans selon le plan standard, avec un traitement cotisant de 50'000 et un compte-épargne acquis de 25'000, se détermine ainsi : $(124.8 \% * 50'000) - 25'000 = 37'400$

L'âge de l'assuré correspond à la différence entre l'année en cours et l'année de naissance.

Selon l'Art. 1b OPP 2, les prestations versées ne devront pas dépasser de plus de 5% l'objectif réglementaire

Exemple de calcul : Le rachat maximal (art. 17) d'une assurée de 30 ans selon le plan standard, avec un traitement cotisant de 50'000 et un compte-épargne acquis de 25'000, se détermine ainsi : $147.3\% * 50'000 - 25'000 = 48'650$
